

How to Use Your Care Entrée Card

1) When you go to the doctor, hospital or lab, you present your Care Entrée card to the receptionist.

2) You identify yourself as a member of the proper network from the logo on the front or back of the card.

3) When the receptionist calls to verify membership status, Care Entrée will find out what procedures are being done and match them to the procedures in the Fee Schedule.

4) You are responsible for paying the PPO-allowable, the preferred price for the procedure!
